1.	Α	method	l for engag	ging i	n a	n acti	vity,	the a	ctivit	y to be enga	iged in b	уар	olurality
of players,	each	player	provided	with	at	least	one	disc	with	identifying	indicia,	the	method
comprising													

each player throwing at least one disc at a target, each disc having identifying indicia for identifying the player throwing said disc,

scoring for each player based on a final resting location of said at least one disc, said at least one disc comprising an aerodynamic flying disc and having a disc body with an annular rim comprising a downturned lip and having an airfoil profile that creates lift in flight, and

said at least one disc having a score value indicator which corresponds to a number of points that can be scored with said disc.

- 2. The method of claim 1 wherein the plurality of players are divided into at least two opposed teams.
 - 3. The method of claim 2 further comprising
- each team alternating on offense and defense, a team on offense attempting to score and a team on defense attempting to prevent the other team from scoring.
 - 4. The method of claim 1 wherein a score is achieved for a disc that hits the target.
 - 5. The method of claim 1 wherein the target is a container and the players attempt to throw the at least one disc into the container.
 - 6. The method of claim 1 wherein the at least one disc is a plurality of discs.
 - 7. The method of claim 1 wherein a player is allowed to retrieve a disc that fails to hit the target and again throw said disc at the target.
- 1 8. The method of claim 1 wherein the target is a container and the players are spaced-apart around and each equidistant from the container.
 - 9. The method of claim 1 wherein the target is a soccer goal.
 - 10. The method of claim 1 wherein the identifying indicia is color.
 - 11. The method of claim 1 wherein the at least one disc's annular rim effects stabilizing gyroscopic action in flight.

12. A method for engaging in an activity, the activity to be engaged in by at least two players, the players divided into a first team and a second team each team with at least one player, the first team provided with at least one disc, the at least one disc having a soft outre portion for inhibiting injury to a person struck by said disc, the method comprising

at least one player of the first team throwing the at least one disc at a player of the second team,

said at least one disc comprising an aerodynamic flying disc and having a disc body with an annular rim comprising a downturned lip and having an airfoil profile that creates lift in flight, and

said at least one disc having a score value indicator which corresponds to a number of points that can be scored with said disc

- 13. The method of claim 11 wherein each team has a plurality of players.
- 14. The method of claim 11 further comprising each team alternating on offense and defense.
 - 15. The method of claim 11 wherein a score is achieved by hitting a player with a disc.
 - 16. The method of claim 11 wherein a score is achieved by a player by catching a disc thrown at said player.
 - 17. The method of claim 11 wherein the second team has at least one disc and a player of the second team throws at least one disc at a player of the first team.
 - 18. The method of claim 11 wherein the at least one disc's annular rim effects stabilizing gyroscopic action in flight.
